SUMMARY

- Director of Product Management with 20+ years across AI-enabled analytics, payments, and enterprise security. Leads and coaches 3 PMs on AI product strategy, roadmap, and go-to-market (GTM) at Qualys.
- Led Agentic AI to general availability: roadmap and GTM adopted across **15+ enterprise pilot accounts**, with **40% converting** to paid proof-of-concepts and a **\$1.5M POC pipeline**.
- Built AI products for both B2B and B2C markets: enterprise security and payments platforms at Qualys, BP, and Western Union, and a consumer healthtech conversational AI chatbot answering users' medical queries in real time.
- Built the business case that secured **\$2M+ in C-suite investment** for an AI security platform spanning 15+ business units, mitigating **\$10M+ in risk exposure**.
- Delivered **\$2.4M in annual savings** with a multi-agent policy automation product, and cut SOC Mean Time to Triage by **>60%** with an AI-driven triage product.
- Payments product background at Western Union Business Solutions: launched NLP-powered voice payments and designed a KYC-as-a-Service compliance platform targeted for select markets.
- Architect-turned-product leader: a credible partner to engineering on platform trade-offs, embedding responsible AI governance (NIST, EU AI Act) and building AI PM capability through internal workshops and playbooks.

EXPERIENCE

Director of Product Management - Qualys (Agentic AI Security)

Feb 2026 – Present

Leading 3 PMs taking the Agentic AI suite from pilots to GA

Pune

- Lead and coach a team of 3 Product Managers owning vision and roadmap for Qualys's Agentic AI security platform, identifying high-value AI use cases and translating multi-agent and LLM capabilities into a GTM strategy.
- Ran 15+ enterprise pilots in the first two quarters against defined success criteria (agentic flow correctness, result accuracy); CXO-level evangelism converted 40% into paid proof-of-concepts, building a \$1.5M POC pipeline.
- Prioritize the roadmap on strategic fit, user value, and business value, refined with Cost of Delay; partner with Engineering, Platform, UX, and Data Science, cutting feature scoping cycle time by 15%.
- Co-design go-to-market with commercial teams (Sales, Marketing), run quarterly roadmap reviews with leadership and Sales, and lead customer calls on product capabilities and fitment.
- Built the requirements and success metrics framework for multi-agent orchestration features that shipped in the GA release.

Fractional CPO, Part-time Advisory (B2B & B2C)

Jul 2024 – Present

Shipped B2C healthtech LLM product alongside B2B AI advisory

Remote

- Defined product strategy for a consumer healthtech conversational AI chatbot answering users' medical queries in real time, owning the query-accuracy and response-safety framework from discovery through launch.
- Served as Fractional CPO for early-stage AI founders across B2B and B2C, identifying high-value AI use cases and defining roadmaps and user personas that took 3+ 0-to-1 concepts from raw idea to market-ready SaaS in under 4 months each.
- Advised a B2B AgriTech and Crop Insurance platform on the LLM and RAG architecture behind its self-service farmer query product, cutting cost per query by 35% while scaling to 50K+ queries monthly.
- Designed responsible AI compliance protocols aligned to NIST and the EU AI Act, institutionalizing a "Trust by Design" framework adopted across 2 client engagements.

Principal Product Manager - BP (Global GenAI & Cloud Security)

Jul 2021 – Jan 2026

Product owner for enterprise GenAI and AI security across 15+ business units

Pune

- Owned GenAI and cloud security product strategy across 15+ global business units, aligning Security, Engineering, Platform, and Compliance stakeholders on a shared roadmap.
- **AI Defense Ecosystem:** Established standardized AI eval harnesses and end-to-end auditability on a unified Agentic AI trust platform spanning prevention, detection, and posture management, securing \$2M+ in C-suite investment and mitigating \$10M+ risk exposure.
- **AI Policy Foundry:** Cut policy review cycles from 1–3 weeks to 30 minutes with 95%+ policy accuracy and \$2.4M annual savings, using a 5-agent GPT-4 product with full clause-level auditability.
- **AI SOC Portal:** Reduced Mean Time to Triage by >60% and executive reporting overhead by ~50%, sustaining an 85%+ analyst action rate (RAGAS groundedness >0.90) with a LangGraph multi-agent triage product.

- **AI-SPM:** Delivered sub-second threat blocking and predictive drift and anomaly detection across 6 data quality dimensions, flagging issues before business impact and automating NIST & EU AI Act compliance evidence.
- Led a 25-person product team without direct reporting lines, setting its vision, goals, and priorities while sustaining 94% retention; built organizational AI capability through the corporate AI Maturity Index, accelerating cloud time-to-market for new applications by 20%.

Lead Principal Consultant - Amdocs (Cloud Modernization)

Jan 2020 – Jul 2021

Secured multi-million dollar contracts via technical RFPs

Pune

- Authored technical product proposals and RFP responses that directly secured multi-million dollar client contracts across cloud modernization engagements.
- Founded the Cloud Transformation Center of Excellence, standardizing repeatable multi-tenant data migration playbooks adopted across 10+ client engagements.

Technical Architect, Payments Products - Western Union Business Solutions Jan 2018 – Jan 2020

Launched NLP voice payments; cut infrastructure costs 70%

Pune

- Owned product discovery through launch for NLP-powered voice payment features, translating customer needs into technical requirements.
- Designed a blockchain-integrated KYC-as-a-Service and compliance platform, validated through executive sign-off and targeted for launch in select markets.
- Slashed core cloud infrastructure costs by 70% by re-architecting legacy payment processing systems into serverless, cloud-native frameworks.

Software Architect - Pitney Bowes

Dec 2013 – Jan 2018

Cut onboarding time 20% via microservices migration

Pune

- Transitioned monolithic architecture to microservices via Domain-Driven Design, accelerating engineering onboarding efficiency by 20%.
- Optimized high-volume order search using tailored Elasticsearch layers, measurably improving platform performance and user satisfaction.

EARLY PROFESSIONAL FOUNDATION

Principal Financial Group (System Test Lead, 2007 – 2013) and **PTC / Cybage** (Test Engineer, 2005 – 2007): risk-based test frameworks, test automation, and API-level testing infrastructure.

EDUCATION & CERTIFICATIONS

Professional Certificate, Data Science & AI

2024

Indian Institute of Management, Kozhikode

MBA (IT)

2003 – 2005

Symbiosis International University

Bachelor of Computer Science

2000 – 2003

Bangalore University

THOUGHT LEADERSHIP & PORTFOLIO

Writing: Published 15+ articles on LinkedIn on Agentic AI, enterprise product strategy, and cloud security, read by a growing product and engineering audience (see Featured section: [linkedin.com/in/mayukh-ghosh-310a327](https://www.linkedin.com/in/mayukh-ghosh-310a327))

Builds: Ships and open-sources hands-on AI product builds, including the AI Defense ecosystem mentioned above, documented with problem framing, trade-offs, and evaluation results (GitHub: github.com/mayukhg)

SKILLS

Product Management: AI Product Strategy & Roadmaps, Discovery through Launch, Strategic Fit & Cost of Delay Prioritization, Success Metrics & KPIs, Go-to-Market (GTM), Senior Stakeholder Alignment

AI & Technology: Generative AI (GenAI), Agentic AI & Multi-Agent Orchestration, Conversational AI Chatbots, LLMs & RAG, Predictive Anomaly Detection

Payments & Fintech: Cross-border B2B Payments, KYC & Compliance Platforms, Payments Cost Optimization

Cloud & Security: AWS Cloud Platforms, Cybersecurity Architecture, Responsible AI Governance (NIST, EU AI Act)

Certifications: AWS Certified Solutions Architect, AWS Certified Security – Specialty, Machine Learning in Production (DeepLearning.AI)
