AI Product Portfolio: <https://shorturl.at/NPymA>

SUMMARY

Product leader with 20+ years building across B2B enterprise security platforms and B2C consumer AI products — a rare combination most PMs never get. Backed by a hands-on cloud engineering and systems-architecture background that gives credible technical depth to evaluate platform trade-offs and drive CXO-level buy-in, not just spec features. A test-and-quality foundation earlier in my career — risk-based test frameworks, automated execution, and API-level verification — now translates directly into rigor around AI evaluation, success metrics, and production monitoring. Secured \$2M+ in capital allocation for enterprise AI initiatives, cut cloud time-to-market by 20%, and slashed infrastructure spend by up to 85% through platform re-architecture. Active thought leader publishing on Agentic AI and enterprise product strategy, with hands-on AI builds shipped in the open. Now driving roadmap and platform strategy for Qualys's Agentic AI security portfolio, targeting senior / principal product leadership roles building agentic and LLM-native platforms at scale.

EXPERIENCE

Director of Product Management — Qualys (Enterprise Cybersecurity, Agentic AI)

Feb 2026 – Present

Platform & roadmap strategy for agentic AI security — multi-agent orchestration, tool use & evaluation

Pune

- Defined product vision and roadmap for Qualys's Agentic AI security platform, translating multi-agent and LLM capabilities into a GTM strategy adopted across 15+ enterprise pilot accounts in the first two quarters.
- Exposed agentic capabilities to engineering teams through **API-first, tool-based surfaces — Model Context Protocol (MCP), CLI, and Slack / Microsoft Teams** — so developers can consume security agents in their own workflows without ever opening a security dashboard.
- Designed **agent action interfaces and tool integrations** that let agents call tools and take real actions (exploit validation, remediation orchestration), moving the product beyond chatbot-style flows toward autonomous, action-taking agents.
- Built the initial requirements, **evaluation, and success-metrics framework** for multi-agent orchestration — defining accuracy criteria, response-safety guardrails, and pass/fail success thresholds that set the baseline for the platform's first GA release.
- Partnered with Engineering, UX, and Data Science to prioritize AI-driven security analytics features, cutting feature scoping cycle time by 15% through structured cross-functional rituals.
- Led CXO-level evangelism sessions on Agentic AI capabilities, converting 40% of pilot conversations into paid proof-of-concept commitments within the first quarter of rollout.

Fractional CPO / Independent AI Product & Strategy Consultant (B2B & B2C)

Jul 2024 – Present

Shipped B2C healthtech LLM product alongside B2B AI advisory

Remote

- Defined product strategy for a consumer healthtech app where an LLM answers users' medical queries in real time, owning the query-accuracy and response-safety evaluation framework from MVP through launch.
- Served as Fractional CPO for early-stage AI founders across B2B and B2C, defining roadmaps and user personas that took 3+ 0-to-1 concepts from raw idea to market-ready SaaS in under 4 months each.
- Architected a computer-vision MVP for a Digital Wellness startup, running rapid A/B test loops that lifted user engagement by 24% within the first 6 weeks of launch.
- Advised a B2B AgriTech and Crop Insurance platform on LLM and RAG architecture, cutting infrastructure cost per query by 35% while scaling to 50K+ farmer queries monthly.
- Designed compliance protocols aligned to NIST and the EU AI Act, institutionalizing a "Trust by Design" framework adopted across 2 client engagements.

Head of Cloud Engineering — BP (Global GenAI & Cloud Security)

Jul 2021 – Jan 2026

Secured \$2M+ AI funding, cut time-to-market 20%

Pune

- Secured \$2M+ in capital allocation for enterprise AI initiatives by presenting data-backed ROI models to C-suite executives across 15+ business units.
- Designed and launched the "AI Defense Ecosystem" as **reusable platform capabilities** (Prevention, Detection, Governance modules), scaling adoption across BP's global cloud security portfolio.
- Owned GenAI and cloud security product strategy as an **internal platform serving 15+ global business units** — aligning internal PMs, engineering leaders, and compliance stakeholders on a shared roadmap and reusable standards.
- Built the corporate "AI Maturity Index" and deployment framework, accelerating cloud time-to-market for new applications by 20%.

- Established the AI Policy Foundry as a **reusable governance capability** to automate policy updates, cutting manual policy review cycle time by an estimated 50%.
- Directed a 25-person cross-functional engineering and product team, achieving a 94% retention rate over the tenure.

Lead Principal Consultant — Amdocs (Cloud Modernization)

Jan 2020 – Jul 2021

Secured multi-million dollar contracts via technical RFPs

Pune

- Authored technical product proposals and RFP responses that directly secured multi-million dollar client contracts across cloud modernization engagements.
- Founded the Cloud Transformation Center of Excellence, standardizing multi-tenant data migration playbooks adopted across 10+ client engagements.
- Led cloud modernization initiatives embedding next-gen analytics capabilities into legacy enterprise systems for 3 major telecom clients.
- Partnered with client engineering and business stakeholders to translate modernization roadmaps into phased delivery plans, reducing migration risk incidents by 25%.

Technical Architect, Payments Products — Western Union Business Solutions

Jan 2018 – Jan 2020

Cut infrastructure costs 70% via serverless, event-driven re-architecture

Pune

- Slashed core cloud infrastructure costs by 70% by re-architecting legacy processing systems into **serverless, event-driven, cloud-native** frameworks.
- Owned technical product discovery for voice-based payment features powered by NLP models, translating customer research into engineering requirements.
- Designed a blockchain-integrated KYC-as-a-Service and compliance platform, validated through direct executive sign-off before rollout.

Software Architect — Pitney Bowes

Dec 2013 – Jan 2018

Cut onboarding time 20% via microservices migration

Pune

- Transitioned monolithic architecture to microservices via Domain-Driven Design, accelerating engineering onboarding efficiency by 20%.
- Optimized high-volume order search using tailored Elasticsearch layers, measurably improving platform performance and user satisfaction.

Early Professional Foundation

- **Principal Financial Group — System Test Lead (2007–2013):** Designed risk-based test frameworks, automated script execution, and resource plans.
- **PTC | Cybage — Test Engineer (2005–2007):** Orchestrated multi-OS functional verification and API-level automated testing infrastructure.

EDUCATION & CERTIFICATIONS

- **Professional Certificate, Data Science & AI** — Indian Institute of Management, Kozhikode (2024)
- **MBA (IT)** — Symbiosis International University (2003–2005)
- **Bachelor of Computer Science** — Bangalore University (2000–2003)

THOUGHT LEADERSHIP & PORTFOLIO

- **Writing:** Published 15+ articles on LinkedIn on Agentic AI, enterprise product strategy, and cloud security, read by a growing product and engineering audience.
- **Builds:** Ships and open-sources hands-on AI product builds, documented with problem framing, trade-offs, and evaluation results (GitHub: github.com/mayukhg).

SKILLS

AI & Product: Agentic AI Strategy & Roadmaps, Multi-Agent Systems Orchestration, Platform Product Management, AI Evaluation & Governance (golden datasets, regression testing, success metrics), Human-in-the-Loop, LLMs & RAG, GTM Strategy, CXO-Level Evangelism

Platform & Developer Experience: API-First Design, Developer Experience & Internal Developer Portals, Tool Use / Action Interfaces (MCP), Event-Driven Architecture, Observability

Cloud & Security: Enterprise Cloud Platforms (AWS), Cybersecurity & Governance Architecture, Risk & Compliance (NIST, EU AI Act)

Certifications: AWS Certified Solutions Architect, AWS Certified Security – Specialty, Machine Learning in Production (DeepLearning.AI)
